Question 1

Write a function that takes in a string of one or more words, and returns the same string, but with all five or more letter words reversed. Strings passed in will consist of only letters and spaces. Spaces will be included only when more than one word is present.

Examples

“Welcome” => returns “emocleW”

“to the jungle” => returns “to the elgnuj”

“we have got fun and games” => returns “we have got fun and semag”

“We got everything you want honey” => returns “We got gnihtyreve you want yehon”

“we know the names” => returns “we know the seman”

Question 2

Write a function that is given a string, detect whether or not the string is a pangram. Return True if it is, False if not. Ignore numbers and punctuation.

Question 3

Create a function to build a tower given the level of floors.

Example:

```
function buildMyTower($FloorsInt) {  
  
}
```

Output for buildMyTower(6) , 6 floors

```
‘ * ‘  
| *** |  
| ***** |  
| ***** |  
| ***** |  
| ***** |  
|*****|
```
